READİNG ASSIGNMENT 3

Subject: In Practice: UML Software Architecture and Design Description

Advisors: Dr. Ayça Tarhan , Dr. Tuğba Erdoğan , Pelin Canbay , Burcu Yalçıner, Nebi Yılmaz

In Practice: UML Software Architecture and Design Description

Uml have in software engineering since 1997.Offer to software developer 13 type of diagram.it design what we should to in our progress and help us to understand progress easily.

Practitioner reflections on UML use

Uml modelling describing different architectural view to us. This architectural views are like logical views and scenarios. Also uml specification let us the language syntax and semantic. Uml help us to develop our project in a correct communication. The guys in the reading assignment test it and see if development don't use uml diagram they lost time cause of false communication. Also we can see it figure on reading assignment.
